## PROFILE

Final year IT student at FON in Belgrade with a strong interest in full-stack development. Passionate about building web applications and continuously learning new technologies. Familiar with both frontend and backend tools and frameworks.

## EXPERIENCE

### Frontend Intern – Carrier Rute (US-based startup)

May 2025 – Present

- Working with Angular to build and maintain responsive web components
- Collaborating with a distributed team using Scrum methodology
- Participating in daily standups and code reviews

### Software Engineering Intern – Telekom Srbija

August 2024

- Gained insight into enterprise software development and mediation
- Passed basics in working with databases, networks and devops

## PROJECTS

### RELOF3 Project – Local CMS Platform for Local Governments

May 2025 – present

- Leading a team of 3 developers in designing and building a scalable, transparent web solution using PHP and modern frontend technologies
- Responsible for defining project requirements and delivering the MVP, with guidance from a senior mentor

### Administrative Java Application – Faculty of Forestry

January – May 2025

- Java application for managing delivery notes, invoices, and statistical tracking
- Used Java Swing + MySQL, following MVC pattern
- Deployed internally for faculty administration tasks

### Multiple Full-Stack Projects (Laravel + React)

2024 – 2025

- Built various academic full-stack apps for university assignments
- Used RESTful APIs, authentication systems, and database integration
- Managed projects using Git
